| Project Cost (USD)      | \$ 167.20 million                              |

### Project Description

This project invests in multiple sub-projects: adding to and extending 132-Kv power transformers at substations to the secondary transmission grid, replacing overloaded distribution transformers with higher capacity and additional distribution transformer capacity on the 11-kV units, and having spare power transformers for emergencies. This adds 5,021 MVA to transformer capacity and improves efficiency and delivery of the distribution system.

### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
