## Project Description

According to FMO website, Astarta Kiev is one of the top five integrated agri businesses of Ukraine. The company is active in four complementary business segments: agriculture, dairy, sugar production and soy processing. The FMO facility will be used for working capital, among others investments in crops in the fields, crop processing and financing inventories to enable sale after harvest season. With this facility FMO supports a long-standing client that has limited access to hard currency funding because of the volatile macro-economic and business environment in Ukraine.
