Project Description

The objective of this second operation is to help reduce morbidity and mortality caused by chronic noncommunicable diseases in Argentina, prioritising the population with public coverage only. Specifically, this operation proposes to help: (i) prioritise the primary care level as the gateway to the health care system; (ii) increase the population's access to screenings for classification according to health risk; and (iii) increase access to timely treatment for those with moderate or high health risk suffering from chronic conditions.

ACCOUNTABILITY MECHANISM OF IDB/ IIC

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
