Project Description

The general objective of the program is to improve the international competitive positioning of the productive sector by designing and implementing a technology platform for rules, regulations, and processes to simplify and facilitate international trade and foreign investment operations: the Argentine International Trade Single Window, known by its Spanish-language acronym, VUCEA. The specific objectives are: (i) to optimize the country's international trade processes through improvement of the rules and regulations, processes, technologies, and human resources of the public and private institutions involved; (ii) to reduce international trade-related times and costs; (iii) to deliver up-to-date information and services offered by public and private institutions involved in the country's trade facilitation and trade promotion processes; (iv) to strengthen those entities technically and institutionally for sustainable operation of the VUCEA; and (v) to facilitate interoperability of the VUCEA with the international trade platforms of other countries.

ACCOUNTABILITY MECHANISM OF IDB/ IIC

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
